This price list sets forth the service offerings, rates, terms and conditions applicable to the local exchange, exchange access, and intrastate toll communications services within the state of Florida.

PRICE LIST FORMAT

- A. Sheet Numbering** - Sheet numbers appear in the upper right corner of the page. Sheets are numbered sequentially. However, new sheets are occasionally added to the price list. - C. Paragraph Numbering Sequence** - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:
- 2.
 - 2.1.
 - 2.1.1.
 - 2.1.1.A.

 - 2.1.1.A.1.(a).
 - 2.1.1.A.1.(a).I.
 - 2.1.1.A.1.(a).I.(i).
 - 2.1.1.A.1.(a).I.(i).(1).
- D. Check Sheets** - The check sheet lists the sheets contained in the price list, with a cross reference to the current revision number. When new pages are added, the check sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on the check sheet if these are the only changes made to it (i.e., the format, etc. remains the same, just revised revision levels on some pages). C

SECTION 3 - DESCRIPTION OF SERVICES, (CONT'D.)**3.7 Distance Calculations**

Where charges for a service are specified based upon distance, the following rules apply:

3.7.1 Distance between two points is measured as airline distance between the rate centers of the originating and terminating telephone lines. The rate center is a set of geographic coordinates, as referenced in Local Exchange Routing Guide issued by Bellcore, associated with each NPA-NXX combination (where NPA is the area code and NXX is the first three digits of a seven-digit telephone number). Where there is no telephone number associated with an access line on the Company's network (such as a dedicated 800 or WATS access line), the Company will apply the rate center of the Customer's main billing telephone number.

3.7.2 The airline distance between any two rate centers is determined as follows:

Step 1: Obtain the "V" (vertical) and "H" (horizontal) coordinates for each Rate Center from the above-referenced Bellcore document.

Step 2: Compute the difference between the "V" coordinates of the two rate centers; and the difference between the two "H" coordinates.

Step 3: Square each difference obtained in step (b) above.

Step 4: Add the square of the "V" difference and the square of the "H" difference obtained in step C) above.

Step 5: Divide the sum of the squares by 10. Round to the next higher whole number if any fraction is obtained.

Step 6: Obtain the square root of the whole number result obtained above. Round to the next higher whole number if any fraction is obtained. This is the airline mileage.

3.7.3 The formula for distance calculations is:

$$\sqrt{\frac{(V_1 - V_2)^2 + (H_1 - H_2)^2}{10}}$$

Eligible customers may order the Unlimited Plans on a maximum of 10 lines per service address. Business customers with multiple service addresses may order the Unlimited Plans subject to the preceding eligibility requirements.

Customers must use MetTel as their local, regional toll and long distance carrier in order to qualify for these plans. If a customer PIC's "None" for regional and long distance, they will still qualify for the unlimited local plan. If they PIC "None" for long distance, they will still qualify for the unlimited local and regional plan or an unlimited local and a per minute MetTel regional calling plan.

These plans only apply to voice traffic for sent-paid, directly-dialed local, regional toll and domestic long distance calls, i.e., in-state and state-to-state. Calls to Internet Service Providers, which is non-voice information access traffic, are not covered under this plan. MetTel reserves the right to terminate the MetPak Advantage Plans for customers who use the service for non-voice traffic or with services or equipment as defined in this section.

(A) Billing of Foreign Exchange Service Provided by Multiple Companies

A. Each company will bill for the portion of the service provided by their respective service publications based on their terms, conditions, rates and charges as appropriate.

B. The charges billed by each company for the interoffice channel between exchange telephone company central offices are determined as follows:

1. The total mileage for the service is computed using the V&H coordinates set forth in the National Exchange Carrier Association, Inc., Tariff F.C.C. No. 4 (NECA No. 4).
2. A billing factor is determined from the NECA No. 4 tariff. This factor represents the percentage of the distance between exchange telephone company central offices that will be billed by each company. The billing factor is multiplied by the total charge for all of the miles to determine the amount to be billed by the Company.
3. For the fixed recurring rate element and the nonrecurring charge associated with the interoffice channel between exchange telephone company central offices, 50 percent of each company's rate will apply for each end of the interoffice channel provided. If the company does not bill for either end of the interoffice channel, then the fixed recurring charge and nonrecurring charge shall not apply.

SECTION 5 – SERVICES AND RATES AVAILABLE IN FRONTIER (FVERIZON) EXCHANGES T**5.14 Calling Features****5.14.1. Description**

1. Call Forwarding

This service feature permits a subscriber to arrange to have all incoming calls to his telephone automatically transferred to another dialable telephone number during any period in which this feature is activated. Calls may be transferred to long-distance telecommunications points, subject to the availability of the necessary facilities in the central office from which the calls are to be transferred. Where a charge (local or long distance) is applicable for a call between the subscriber's telephone and telephone to which calls are to be forwarded, such charge is applicable to the subscriber on every call forwarded to and answered at that telephone. Call Forwarding shall not be used to extend calls on a planned and continuing basis to intentionally avoid the payment in whole or in part of message toll charges that would regularly be applicable between the station originating the call and the station to which the call is transferred. This service may be provided to a group of individual lines arranged for rotary hunting, where network switching facilities will permit.

2. Multipath

This feature allows a Call Forwarding customer the capability to specify the number of calling paths to be made available to forward calls simultaneously to the destination directory number. This allows customers who are forwarding calls intended for a group of lines arranged in a hunt group to control the number of simultaneous calls that can be forwarded to a target number. In order to use the Multipath feature, the "call forward to" number must be in a hunt group.

Multipath is available only as an enhancement to Call Forwarding.

5.14 Calling Features (Cont'd)

5.14.1. Description (Cont'd)

3. **Three-Way Calling**
This feature permits a subscriber to add a third party to an already-established connection without the assistance of an operator.

At the customer's request, the "per activation" service will be blocked on all lines at no charge.
4. **Call Waiting/Cancel Call Waiting**
Call Waiting provides a tone signal to indicate to a subscriber who is using his telephone that another party is attempting to call him. It also permits the subscriber to answer the incoming call while holding his original call.

Cancel Call Waiting allows a subscriber with Call Waiting to inhibit the operation of Call Waiting for one call. During this call, Call Waiting shall be inactive so that anyone calling the Call Waiting subscriber will receive a normal busy signal, and no call waiting tones will interrupt the subscriber's call.
5. **Speed Dialing**
This service permits a subscriber to call certain other predetermined telephone numbers by dialing an abbreviated code rather than the entire seven- or ten-digit telephone number. The two arrangements available are an 8-number capacity (8-code) and a 30-number capacity (30-code).
6. **Distinctive Ring**
This service allows coded ringing to be applied to an individual line where each of the two directory numbers would have a uniquely coded ring for customer identification.
7. **Remote Call Forwarding**
This service resides inside the Company central office and only offers inbound call capability. Calls are automatically directed to a pre-assigned telephone number and line which terminates at the location of the customer's service address.

SECTION 6 – SERVICES AND RATES AVAILABLE IN EMBARQ FLORIDA, Inc. d/b/a CENTURYLINK**6.8 Custom Calling Features****6.8.1 Definitions**

Call Forward Features permit the forwarding of incoming calls under a variety of conditions to another telephone number either by dialing an activation code or via preprogramming by the Company. Calls may be forwarded to any number subject to the availability of the necessary facilities in the central office from which the calls are to be transferred. The customer subscribing to this service is responsible for applicable usage charges.

Call Forward Busy will allow incoming calls to be routed to another telephone number when a busy condition is encountered.

Call Forward Don't Answer will allow incoming calls to be routed to another telephone number when the called line is unanswered.

Three-Way Calling Service - This service permits an existing call to be held, and by dialing, a second telephone call can be established and added to the connection. Three-Way Calling is available on a flat rate or a usage sensitive basis. The usage sensitive option is only available to business single line customers. Under the usage sensitive option, the customer will incur an activation charge on a completed call. The provision of this service on a usage sensitive basis is subject to technical limitations and is provided on a where available basis.

Call Waiting Service - This service provides a tone signal to indicate to a customer who is using his/her telephone that another party is attempting to call him/her. It also permits the customer to answer the incoming call while holding the original call.

Enhanced Call Waiting - This service combines the features of call waiting and the cancel call waiting feature which allows the customer to defer the call waiting feature to prevent call waiting tones from interrupting calls or disrupting data transmissions. Cancel call waiting can be activated before or during a call by dialing an access code and the cancellation stays in effect for the duration of the call. Incoming calls receive a busy signal while cancel call waiting is in effect.

Speed Calling Service (Abbreviated Dialing Service) - This service permits a customer to call certain other predetermined telephone numbers by dialing an abbreviated code rather than the entire 7 or 10 digit telephone number. The arrangement available is an 8-number capacity (8-code).

6.9 Directory Listings

6.9.1 Definitions

Nonpublished Service Nonpublished numbers will not be furnished upon request of a calling party. However, when a call is placed from a telephone number associated with a nonpublished listing, the number may be disclosed if the called party has the necessary equipment for receiving and/or disclosing incoming telephone numbers. Incoming calls to nonpublished telephone numbers will be completed by the Company only when the calling party places the call by number. The Company will not complete a call to a nonpublished subscriber on behalf of another caller when the caller does not furnish the nonpublished number to the Company. The Company will adhere to this practice notwithstanding any claim of emergency the calling party may present. The acceptance by the Company of the subscriber's request to furnish a nonpublished number does not create any relationship or obligation, direct or indirect, to any person other than the subscriber.

Nonlisted Service A nonlisted telephone number is one for which no listing appears in the alphabetical section of the directory. The number is listed in the directory assistance records and is given out upon request. The acceptance by the Company of the subscriber's request to furnish a nonlisted telephone number does not create any relationship or obligation, direct or indirect, to any person other than the subscriber.

Vanity Listings - Where available, a subscriber may request to have the assigned telephone number published in the telephone directory in upper case alpha form, i.e., "333-THIS", rather than 333-8447. Use of Vanity Listings is not exclusive to any single subscriber. The letters "Q" and "Z" are not available nor may the "#" or "*" symbols be used with this service. The numbers "0" or "1" may not be used to represent the letters "O" or "I", respectively, in a Vanity Listing. Prior to establishing a Vanity Listing, the Company reserves the right to require, when necessary in its sole discretion, satisfactory evidence from the subscriber that the subscriber is authorized to use any trade name, business name, or any other name or term, requested by the subscriber, which is copyrighted or otherwise reserved.

Additional name listings in excess of those permitted without extra charge, reference listings, alternative (directive) listings, temporary listings, foreign exchange listings, listings for clients of Shared Tenant Service, Mobile Carriers, and Pay Telephone Service (PATS) operations and additional line matter, where permitted, are furnished at the following monthly rates:

8.8 Telecommunications Service Priority (TSP) System

(T)

8.8.1 Description

The following rates and charges are for calling services features and packages only and are in addition to the applicable service charges, monthly rates, and nonrecurring charges for the exchange access line and other services with which it is associated.

The Telecommunications Service Priority (TSP) System is a structured coding scheme that prescribes the order in which National Security Emergency Preparedness (NSEP) telecommunications services are installed or restored. TSP service is limited to qualifying state and local governments, the federal government, foreign governments and certain private industry telecommunications services. The Company can only accept orders for TSP service from holders of valid TSP Authorization Codes. TSP Authorization Codes are administered by The Manager, National Communications System (TSP Program Office), Washington, D.C. 20305-2010. The TSP System was developed to support the requirements of the U. S. Government and applies only to NSEP telecommunications services to which the Company is able to apply priority treatment. It requires and authorizes priority action by the Company.

Conditions of emergency or crises that cause invocation of NSEP treatment can only be declared by authorized officials of the Federal Government or other officials (Federal or non-Federal) specified by the Manager - National Communications System (NCS) on behalf of the Executive Office of the President of the United States.

8.8.2 Service Limitations

(T)

Priority installation and/or restoration of NSEP telecommunications services shall be provided in accordance with Part 64.401, Appendix A, of the Federal Communications Commission's Rules and Regulations.

In addition, TSP System service shall be provided in accordance with the guidelines set forth in "Telecommunications Service Priority (TSP) System for National Security Emergency Preparedness (NSEP) Service User Manual" (NCS manual 3-1-1 dated July 9, 1990) and "Telecommunications Service Priority (TSP) System for National Security Emergency Preparedness (NSEP) Service Vendor Handbook" (NCS manual 3-1-2 dated July 9, 1990).

The customer for the TSP System service must also be the same customer for the underlying Exchange Service with which it is associated.

SECTION 8 – MISCELLANEOUS (Cont'd)

(T)

8.8 Telecommunications Service Priority (TSP) System (Cont'd)

(T)

8.8.2 Service Limitations (Cont'd)

(T)

The Company will arrange for the installation and/or restoration of TSP System service upon receipt of the proper certification as specified in A. preceding.

It is the responsibility of the TSP user to provide the TSP Authority Code to the Company with each service request.

When performing Priority Installation or Priority Restoration (repair) on TSP-designated services in compliance with the Rules and Regulations cited in A. preceding, the Company may not be in a position to notify the customer regarding additional labor charges if additional labor is required. The customer recognizes that quoting charges and obtaining permission to proceed with the installation or restoration of service may cause unnecessary delays and grants the Company the right to quote charges after the installation or restoration has been completed.

8.8.3 Priority Installation or Repair

(T)

1. When a customer for TSP System service requests that service be installed or repaired on an expedited or emergency basis in accordance with Part 64.401, Appendix A, of the Federal Communications Commission's Rules and Regulations, the customer will be required to bear the excess costs of providing service on an expedited basis.

2. The calculated excess costs would be in addition to all other service and installation charges normally applicable.

8.8.4 Rules and Regulations

(T)

Under certain conditions, it may be necessary to preempt one or more customer services with a lower (or no) restoration priority in order to install or restore NSEP telecommunications service(s). If preemption is necessary and if circumstances permit, the Company will make every reasonable effort to notify the preempted customer of the action to be taken.

No charge applies when a TSP designation is discontinued.

SECTION 8 – MISCELLANEOUS (Cont’d) (T)**8.8 Telecommunications Service Priority (TSP) System (Cont’d)** (T)**8.8.4 Rules and Regulations (Cont’d)** (T)

With the exception of credit information, a customer obtaining TSP System service acknowledges and consents to the provision of certain customer service details by the Company to the Federal Government to allow for the proper maintenance and administration of the TSP System. That information includes but is not necessarily limited to:

- Confirmation of completed TSP service orders directly to the Manager, National Communications System (NCS);
- Verification of installation and/or restoration priority level assignment(s) with the Manager, NCS;
- Reconciliation of TSP service information with the Manager, NCS, or the customer (prime service vendor).

8.8.5 Definitions (T)**National Communications System (NCS)**

This includes maintaining a twenty-four hour point-of-contact to handle emergency provisioning requests, assigning priority levels and Authorization Codes and maintaining data on TSP assignments.

National Security Emergency Preparedness (NSEP) Services

NSEP services are telecommunications services that are used to maintain a state of readiness or to respond to and manage any events or crises (local, national or international) which causes or could cause injury or harm to the population, damage to or loss of property, or degrade or threaten the NSEP posture of the United States.
